

MICHAEL RAO

(646) 240-1135 | cn.yrao@gmail.com | New York, NY | progressiveoverflow.com

SUMMARY

Senior full-stack developer and squad lead with 9+ years in financial technology at Morgan Stanley, currently leading a Snowflake-based fee-revenue and financial reporting platform for Wealth Management leadership and the CFO organization. Track record of building five financial platforms end-to-end from the ground up — each migrating data off an external system and tied to a regulatory deadline or acquisition — spanning financial data, compliance controls, and cross-functional delivery.

SKILLS

Languages: C#, Python, Java, TypeScript, SQL, Shell

Frameworks & Tools: .NET, ReactJS, Node.js, FastAPI, Flutter, WPF, ASP.NET

Data & Cloud: Snowflake, DB2, Teradata, MongoDB, AWS, Autosys, Git

Practices: Agile/Scrum, trunk-based development, CI/CD, MVVM, ETL pipeline design

EXPERIENCE

Morgan Stanley

New York, NY | Oct 2023 – Present

Senior Full-Stack Developer, Squad Lead · *Manages 4 engineers; delivery owner for WM Financial Technology*

- **Advisory Fee & Financial Reporting Platform (Snowflake)** — Leading architecture of a Snowflake cloud data platform delivering advisory fee revenue, AUM, and ROA reporting across ~\$3 trillion in client assets to Wealth Management leadership and the WM CFO organization — replacing manual, Excel-driven EUC processes with reporting at scale
- Building a ReactJS and FastAPI application featuring a Snowflake Cortex Agent chat that lets users query fee, AUM, and ROA data conversationally, powered by Semantic Views, Skills, and Dynamic Tables
- **EquityZen Acquisition (~\$100M)** — Led a cross-functional Agile squad through end-to-end technical delivery, coordinating data migration, systems integration, and operational cutover; Python reconciliation pipelines achieved zero accounting discrepancies at cutover
- Engineered an audited C# application enabling Operations to execute, review, and audit acquisition-related accounting adjustments, with approval workflows and a full audit trail for regulatory traceability
- **FA Notes System — Canadian Expansion (MSWC)** — Expanded the FA Notes platform to Canadian regulatory and compensation models — jurisdiction-configurable controls, audit logging, and full loan lifecycle tracking — enabling MSWC's first Canadian FA Recruit onboarding

Progressive Overflow

Remote | Apr 2023 – Sep 2023

Owner & Developer

- Architected an offline-first Flutter mobile app with local Realm persistence synced to MongoDB Atlas — full functionality with zero connectivity, changes reconciling automatically on reconnect
- Built progressiveoverflow.com, an Angular/TypeScript algorithm-visualization platform: 68+ problems across 8 categories with animated, step-by-step generators

Morgan Stanley

New York, NY | Mar 2017 – Mar 2022

Senior Full-Stack Developer

- **General Ledger Integration** — Led GL decommissioning across three acquisitions — E*TRADE (\$13B), Eaton Vance (\$7B), Shareworks (~\$900M) — engineering automated journal-ingestion pipelines in Teradata, Shell, and Python orchestrated via Autosys and an in-house ETL framework, plus a C# .NET WPF migration tool with audited correction and approval-gated posting
- **Manual Automation Delivery (MAD)** — Eliminated a recurring monthly EUC process across fees and billing, automating tens of thousands of journal entries per month and replacing hundreds of hours of manual Operations effort with structured logging, persistent archival, and completion/failure notifications
- **Retail Inventory Application (RETINA)** — Delivered a C# .NET WPF (MVVM) hub for inventory maintenance, position adjustments, and finance reporting (~15 daily users), backed by DB2 stored procedures computing real-time Balance Sheet and P&L positions at near-zero latency
- Drove trunk-based development and CI/CD adoption across the team, reducing integration overhead and enabling frequent, stable releases with direct client feedback loops

EDUCATION

B.S. Computer Science & Applied Mathematics and Statistics — Stony Brook University | Dec 2016 · Dean's List (4 semesters)
